

Neu Essence

Neu Essence (D), Neu Essence (ENT), Neu Essence (P)

«Neu Essence» series is a special and completely natural form of meridian treatment products. Its formulation originates from the meridian principles of traditional Chinese medicine, along with the utilization of advanced technology from the United States to extract the active ingredients from the Chinese medicines. The technology used to formulate the dosage form is also an advanced technology, incorporating new technology such as nanoparticles, which combined the active ingredients with the nanoparticles for better delivery system, and also the principles of natural biodegradation of dosage form by the body. The final product of the dosage form is hence, in the form of nanospheres, which is a stable and controlled-release dosage form. It enables the products to be applied topically and yet the effect of the products can be seen instantly, within a short 5-10 minutes after application.

Neu Essence (P)

Main functions

1. All types of pain can be relieved within 5-10 minutes (external bleeding wound excluded): Gastric pain, headache and migraine, abdominal pain and diarrhea, rheumatism pain, arthritic pain, muscle soreness and pain, backache, pain at the neck and shoulder, sharp bone pain, neuropathic pain, muscle cramp and tingling sensation caused by stagnant blood.
2. The therapeutic effects can be seen rapidly after application, long term use can even treat the source of pain.
3. After application of the product, the skin will be rejuvenated, become radiant and fresh, also leave the body comfortable and relaxed.

Precautions during treatment

1. For instant relieve of pain and relaxant effect, the treatment duration is usually 3-6 months (depends on how long the problem has been persisting).
2. During treatment, it is recommended to stop the treatment for 2 days after 3-5 days of application, in order to ensure the efficacy of the treatment, by giving the body meridians opportunity and time to recover naturally.
3. Due to the variable anatomical and physiological changes in women during pregnancy, the products are not recommended for pregnant women use.
